¹ The source data for each table is indicated in parentheses for each section. A calendar year is the basis for data from the Census Bureau. Most of the other data on these pages are from the National Child Abuse and Neglect Data System (NCANDS) or the Adoption and Foster Care Analysis and Reporting System (AFCARS) and are based on the Federal fiscal year, October 1 through September 30.

² The total child population and data on race/ethnicity represent estimates from the Census Bureau (<http://www.census.gov/popest/data/datasets.html>). Child poverty data are from the Census Bureau's American Community Survey (ACS). Child poverty data for 2012 were not available for inclusion in this report; however, they will be included in the 2010-2013 report.

³ For race/ethnicity tables, all races exclude children of Hispanic origin. The Child Welfare Outcomes Report Data Site (<http://cwoutcomes.acf.hhs.gov/data/overview>) provides alternative race/ethnicity breakdowns in which race and ethnicity are treated as two separate categories.

⁴ A child victim is defined as a child who is the subject of a maltreatment report for which the disposition is substantiated, indicated, or "alternative response victim." The rate for foster care entry is per 1,000 children in the state population. Data on child maltreatment victims are from NCANDS. Data on foster care entry rate, children in foster care on 9/30, and children adopted are from AFCARS.

⁵ As of 2012, there is a new methodology used to calculate the caseworker visits measures. Because the new methodology limits data comparisons with prior years, caseworker visits data from 2009 through 2011 are not included in this table. All states have the option of using an approved sampling procedure for the caseworker visits reporting requirement. See appendix C for more information on how these data are calculated and for a list of states using sampling methodology.

⁶ The unique count of child victims counts a child only once regardless of the number of times he or she was found to be a victim during the reporting year. This is a change from prior reports, and these data are now consistent with the reporting practice in the Child Maltreatment reports.

⁷ The rates for Child Protective Services Responses and victims are per 1,000 children under age 18; for fatalities, the rate is per 100,000 children under age 18.

⁸ These percentages are calculated against the number of unique victims. A child may have been the victim of more than one type of maltreatment, or the same type of maltreatment more than once. As a result, the total percentages both within and across maltreatment categories may exceed 100.

⁹ Response time is defined as the time between the report of suspected maltreatment and the first face-to-face contact with the alleged victim or with another person who can provide information on the allegation.

¹⁰ All races exclude children of Hispanic origin. The Child Welfare Outcomes Report Data Site (<http://cwoutcomes.acf.hhs.gov/data/overview>) provides alternative race/ethnicity breakdowns in which race and ethnicity are treated as two separate categories.

¹¹ There is no federal definition for a child waiting to be adopted. The definition used in the tables on this page includes children and youth through age 17 who have a goal of adoption and/or whose parents' parental rights have been terminated. It excludes children 16 years old and older whose parents' parental rights have been terminated and who have a goal of emancipation. A state's own definition may differ from that used here.

¹² Children older than 17 years fall outside of the definition used to identify waiting children and are therefore excluded from this table.

¹³ For race/ethnicity tables, all races exclude children of Hispanic origin. The Child Welfare Outcomes Report Data Site (<http://cwoutcomes.acf.hhs.gov/data/overview>) provides alternative race/ethnicity breakdowns in which race and ethnicity are treated as two separate categories.

Composite and Individual Measures Established for the Federal Child and Family Services Reviews¹⁵ (AFCARS Foster Care File)

Composite 1: Timeliness and Permanency of Reunification¹⁶

	2009	2010	2011	2012
Composite Score¹⁷	135.6	138.8	139.8	144.1
C1.1: Of all children discharged from foster care to reunification during the year who had been in care for 8 days or longer, what percentage were reunified in less than 12 months from the date of the latest removal from home? (Includes trial home visit adjustment)	75.2	73.0	75.0	73.4
C1.2: Of all children discharged from foster care to reunification during the year who had been in care for 8 days or longer, what was the median length of stay (in months) from the date of the latest removal from home until the date of discharge to reunification? (Includes trial home visit adjustment)	4.6	6.2	5.9	5.9
C1.3: Of all children who entered foster care for the first time in the 6-month period just prior to the year shown, and who remained in care for 8 days or longer, what percentage were discharged from foster care to reunification in less than 12 months from the date of the latest removal from home? (Includes trial home visit adjustment)	57.0	61.5	60.0	64.0
C1.4: Of all children discharged from foster care to reunification in the 12-month period prior to the year shown, what percentage reentered care in less than 12 months from the date of discharge?	9.3	8.2	8.7	6.8

Composite 2: Timeliness of Adoptions

	2009	2010	2011	2012
Composite Score	103.5	123.7	115.7	139.7
C2.1: Of all children discharged from foster care to a finalized adoption during the year, what percentage were discharged in less than 24 months from the date of the latest removal from home?	19.4	21.9	25.1	28.6
C2.2: Of all children discharged from foster care to a finalized adoption during the year, what was the median length of stay in care (in months) from the date of latest removal from the home to the date of discharge to adoption?	35.1	34.8	35.0	33.5
C2.3: Of all children in foster care on the first day of the year who were in care for 17 continuous months or longer (and who, by the last day of the year, were not discharged from foster care with a discharge reason of reunification, living with relative, or guardianship), what percentage were discharged from foster care to a finalized adoption by the last day of the year?	20.8	20.3	23.0	36.7
C2.4: Of all children in foster care on the first day of the year who were in care for 17 continuous months or longer, and who were not legally free for adoption prior to that day (i.e., there was not a parental rights termination date reported to AFCARS for both mother and father), what percentage became legally free for adoption during the first 6 months of the year? ¹⁸	15.4	13.8	13.2	18.0
C2.5: Of all children who became legally free for adoption in the 12-month period prior to the year shown (i.e., there was a parental rights termination date reported to AFCARS for both mother and father), what percentage were discharged from foster care to a finalized adoption in less than 12 months from the date of becoming legally free?	53.6	53.0	59.8	74.6

Composite 3: Achieving Permanency for Children in Foster Care for Long Periods of Time¹⁹

	2009	2010	2011	2012
Composite Score	86.8	84.1	89.6	126.3
C3.1: Of all children in foster care for 24 months or longer on the first day of the year, what percentage were discharged to a permanent home prior to their 18th birthday and by the end of the year?	24.1	26.5	27.0	40.7
C3.2: Of all children discharged from foster care during the year, and who were legally free for adoption at the time of discharge (i.e., there was a parental rights termination date reported to AFCARS for both mother and father), what percentage were discharged to a permanent home prior to their 18th birthday?	89.6	92.5	90.6	95.3
C3.3: Of all children who, during the year shown, either (1) were discharged from foster care prior to age 18 with a discharge reason of emancipation, or (2) reached their 18th birthday while in foster care, what percentage were in foster care for 3 years or longer?	55.2	52.0	57.0	52.7

Composite 4: Placement Stability While in Foster Care²⁰

	2009	2010	2011	2012
Composite Score	78.8	80.0	83.5	85.9
C4.1: Of all children served in foster care during the year who were in care for at least 8 days but less than 12 months, what percentage had two or fewer placement settings?	76.3	77.1	79.2	82.0
C4.2: Of all children served in foster care during the year who were in care for at least 12 months but less than 24 months, what percentage had two or fewer placement settings?	46.2	45.9	48.9	53.0
C4.3: Of all children served in foster care during the year who were in care for at least 24 months, what percentage had two or fewer placement settings?	25.4	25.2	26.2	23.6

¹⁵ Individual measure performance is shown under each composite unless the state did not provide the data necessary to calculate those measures.

¹⁶ Calculation of measures C1.1, C1.2, and C1.3 includes a trial home visit adjustment. For these measures, if a child was reunified with a final placement type of "trial home visit," any length of time in the trial home visit beyond 30 days is excluded from the length of stay calculation done by ACF. In addition, only children in care for at least 8 days are included in these measures.

¹⁷ Detailed information on how the individual measures are combined to form the composites is provided in the Federal Register Announcement published by the Department of Health and Human Services on the Children's Bureau website (<https://www.acf.hhs.gov/programs/cb/resource/data-indicators-second-round-of-cfsrs>).

¹⁸ Legally free means that there was a parental rights termination date reported to AFCARS for both mother and father. This calculation excludes children who, by the end of the first 6 months of the fiscal year, had discharged from foster care to reunification, living with relative, or guardianship.

¹⁹ A permanent home is defined as having a discharge reason of adoption, guardianship, or reunification (including living with relative).

²⁰ The "served" population refers to all children who were in the public foster care system during the year. This number is the sum of two mutually exclusive groups of children: the children who are already in care on the first day of the fiscal year (as of October 1) and the children who enter foster care during the year. An individual child is counted only once for each year.

South Carolina

STATE COMMENT

Lillian B. Koller, J.D., Director
Department of Social Services

The following are South Carolina's comments on the state data presented in *Child Welfare Outcomes 2009–2012: Report to Congress*.

Safety

South Carolina Department of Social Services (SCDSS) intake staff assess all reports made to Child Protective Services (CPS). When a call to CPS alleges suspected child abuse or neglect consistent with how state law defines “abuse” or “neglect,” DSS accepts the report and assigns the case for CPS investigation by DSS staff.

When an intake does not allege suspected child abuse or neglect (high risk and/or safety issues), DSS is authorized to provide services for what state law (SC Code Section 63-7-910) refers to as “other problems of a nature which may affect the stability of family life,” (low risk and/or non-safety issues) to prevent harm to the child.

In January 2012, SCDSS implemented community-based, upfront prevention services statewide. When the intake is referred for prevention services, a contracted provider completes a needs assessment on the family and arranges/provides appropriate services to address the problems affecting the family. If risk increases or safety concerns develop, the provider of prevention services makes a new report on the family to SCDSS intake.

For NCANDS purposes, South Carolina records the intakes that are referred for prevention services (and not referred for investigation) as “Alternative Response Non-Victim” in the FY2012 NCANDS file. This accounts for the increase in the number of “children subject of an investigated report alleging child maltreatment” (from 36,011 in FY2011 to 40,732 in FY2012). This increase in what NCANDS classifies as investigated reports, however, is misleading because, in South Carolina, it includes reports referred for prevention services that are not investigated by DSS for alleged abuse and neglect.
